

# Barrel Pump

AIR DRIVEN

## Description

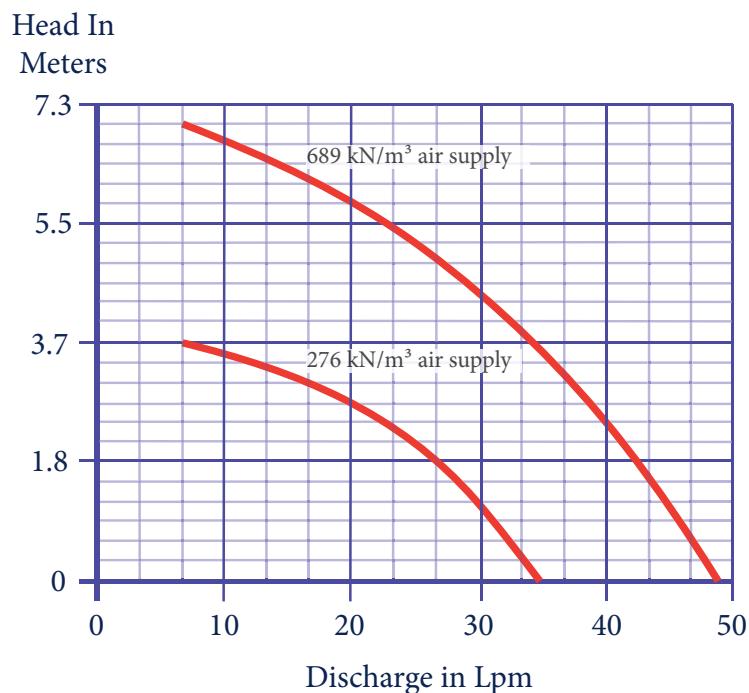

The barrel pump is a precision engineered machine, offering reliability and simple operation. It is capable of operating over a range of air inlet pressures and is ideally suited to transferring light oils. It can be directly inserted into most barrels by means of the provided adapter.

## Machine Features

Fluid outlet connector	Rc 3/4"
Air inlet connector	Rc 1/4"
Air consumption	0.425 M <sup>3</sup> /min
Tube diameter	55mm
Weight	5.3 Kg
Material	Aluminium
IMPA Number (Equivalent)	59.16.51

## Machine data
