

Jetfan 50

WATER DRIVEN
GAS FREEING FAN

Description

The Dasic Jetfan 50 is the smallest and lightest fan in our range and very versatile. Unlike many other market alternatives of the same size, it can be changed between penetrating and extraction. The rigid all stainless steel construction ensure durability and long working life in a tough marine environment. this machine would be especially suitable on small tonnage vessels with limited deck space.

Machine features

- Low water consumption
- Light weight
- Portable
- Robust Construction
- Low maintenance
- Precision engineered

Machine data

Maximum Height	435mm
Maximum Width	356mm
Weight	15 Kg
Supply connection	1" BSP Male
Discharge connection	2" Plain Tube

Innovation that delivers

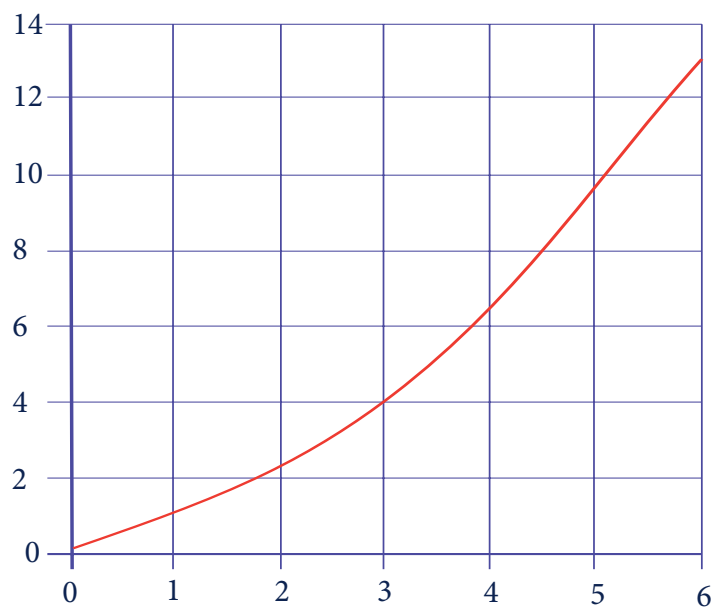

Jetfan 50
